They will devote their undivided attention to the enhancement of the participants' anatomical knowledge and also will take you through the common cosmetic surgical procedures that are outlined in the program. This will be in the form of lectures, cadaver surgery demonstrations, cadaver dissection practice. The participants will be able to attend these programs in person or with the technical help of the supervisor and observe or participate in the surgery as an assistant in the live surgery demonstration.</p> <p>"Understanding of anatomy is fundamental importance in Cosmetic surgery.
